TABLE OF CONTENTS

iii AP* Computer Science Review Companion for Fundamentals of Java
v Preface

UNIT 1 GETTING STARTED WITH JAVA

3 Chapter 1: Background

3 1.1 History of Computers
5 1.2 Computer Hardware and Software
10 1.3 Binary Representation of Information and Computer Memory
19 1.4 Programming Languages
20 1.5 The Software Development Process
23 1.6 Basic Concepts of Object-Oriented Programming
28 Summary

31 Chapter 2: First Java Programs

31 2.1 Why Java?
32 2.2 The Java Virtual Machine and Byte Code
33 2.3 Choosing a User Interface Style
34 2.4 Hello World
37 2.5 Edit, Compile, and Execute
42 2.6 Temperature Conversion
46 2.7 Graphics and GUIs: Windows and Panels
52 Summary

57 Chapter 3: Syntax, Errors, and Debugging

57 3.1 Language Elements
59 3.2 Basic Java Syntax and Semantics
74 3.3 Terminal I/O for Different Data Types
77 3.4 Comments
82 3.5 Programming Errors
87 3.6 Debugging
92 3.7 Graphics and GUIs: Drawing Shapes and Text
100 Summary

105 Chapter 4: Introduction to Control Statements

105 4.1 Additional Operators
107 4.2 Standard Classes and Methods
109 4.3 A Visit to the Farm
111 4.4 The `if` and `if-else` Statements
116 4.5 The `while` Statement
120 4.6 The `for` Statement
124 4.7 Nested Control Statements and the `break` Statement
127 4.8 Using Loops with Text Files
133 4.9 Errors in Loops
137 4.10 Graphics and GUIs: I/O Dialog Boxes and Loops
143 Design, Testing, and Debugging Hints
144 Summary
149 Unit Review

UNIT 2 THE NEXT STEP WITH JAVA

155 Chapter 5: Introduction to Defining Classes

155 5.1 The Internal Structure of Classes and Objects
157 5.2 A `Student` Class
168 5.3 Editing, Compiling, and Testing the `Student` Class
174 5.4 The Structure and Behavior of Methods
177 5.5 Scope and Lifetime of Variables
183 5.6 Graphics and GUIs: Images, a `Circle` Class, and Mouse Events
194 Summary

199 Chapter 6: Control Statements Continued

199 6.1 Logical Operators
212 6.2 Testing `if` Statements
215 6.3 Nested `if` Statements
218 6.4 Logical Errors in Nested `if` Statements
222 6.5 Nested Loops
224 6.6 Testing Loops
228 6.7 Loop Verification
234 6.8 Graphics and GUIs: Timers and Animations
241 Design, Testing, and Debugging Hints
242 Summary

247 Chapter 7: Improving the User Interface

247 7.1 A Thermometer Class
248 7.2 Repeating Sets of Inputs
249 7.3 A Menu-Driven Conversion Program
252 7.4 Formatted Output with `printf` and `format`
257 7.5 Handling Number Format Exceptions during Input
258 7.6 Graphics and GUIs
265 Summary

269 Chapter 8: Introduction to HTML and Applets

269 8.1 Hypertext, Hypermedia, and the World Wide Web
271 8.2 Overview of the Hypertext Markup Language
275 8.3 Simple Text Elements
277 8.4 Character-Level Formatting
278 8.5 Lists
281 8.6 Linking to Other Documents
283 8.7 Multimedia
286 8.8 Tables
288 8.9 Applets
295 Summary
299 Unit Review

UNIT 3 ARRAYS, RECURSION, AND COMPLEXITY

305 Chapter 9: Introduction to Arrays

306 9.1 Conceptual Overview
307 9.2 Simple Array Manipulations
309 9.3 Looping Through Arrays
311 9.4 Declaring Arrays
314 9.5 Working with Arrays That Are Not Full
317 9.6 Parallel Arrays
318 9.7 Two-Dimensional Arrays
321 9.8 Using the Enhanced for Loop
323 9.9 Arrays and Methods
326 9.10 Arrays of Objects
338 9.11 Graphics and GUIs: Changing the View of Student Test Scores
343 Design, Testing, and Debugging Hints
343 Summary

351 Chapter 10: Classes Continued

352 10.1 Class (`static`) Variables and Methods
356 10.2 Turtle Graphics
359 10.3 Java Interfaces—The Client Perspective
362 10.4 Java Interfaces—The Implementation Perspective
367 10.5 Code Reuse Through Inheritance
372 10.6 Inheritance and Abstract Classes
377 10.7 Some Observations about Interfaces, Inheritance, and Relationships among Classes
380 10.8 Acceptable Classes for Parameters and Return Values
383 10.9 Error Handling with Classes
385 10.10 Exceptions
392 10.11 Reference Types, Equality, and Object Identity
395 10.12 Graphics and GUIs: Drawing Multiple Shapes
402 Summary

405 Chapter 11: Arrays Continued

405 11.1 Advanced Operations on Strings
411 11.2 Searching
415 11.3 Sorting
422 11.4 Insertions and Removals
426 11.5 Working with Arrays of Objects
429 11.6 The Class `java.util.ArrayList`
442 11.7 Graphics and GUIs: Menus
450 Summary

455 Chapter 12: Recursion, Complexity, and Searching and Sorting

456 12.1 Recursion
468 12.2 Complexity Analysis
475 12.3 Binary Search
478 12.4 Quicksort
482 12.5 Merge Sort
489 12.6 Graphics and GUIs: Drawing Recursive Patterns
497 Design, Testing, and Debugging Hints
497 Summary
501 Unit Review

Appendix A-1 **Appendix A** Java Resources

Appendix B-1 **Appendix B** Java Language Elements

Appendix C-1 **Appendix C** Operator Precedence

Appendix D-1 **Appendix D** ASCII Character Set

Appendix E-1 **Appendix E** Number Systems

Appendix F-1 **Appendix F** Java Exception Handling

Appendix G-1 **Appendix G** Java Packages and `jar` Files

Appendix H-1 **Appendix H** Files

Appendix I-1 **Appendix I** The `TurtleGraphics` Package

Appendix J-1 **Appendix J** AP Correlations

Glossary-1 **Glossary**

Index-1 **Index**
